Our Core Capabilities

2D & 3D Animations

- Character animations and explainer videos
- Motion graphics
- Interactive animations
- 3D modeling and visualization

Articulate Storyline

- Multi-level course development (Level 1-3.5)
- Gamification and interactive scenarios
- SCORM-compliant learning modules
- Assessment and quiz integration

Additional Expertise: Custom illustrations, storyboard creation, instructional design consulting, and full-service e-Learning development

Why Partner with DConstellations

Animations

We excel in both 2D and 3D animation production with an animation team capable of handling projects of any scale and complexity.

Articulate Storyline Development

Our portfolio demonstrates multi-level Storyline expertise from basic Level 1 courses to advanced Level 3.5 gaming-based modules, ensuring we can meet diverse learning objectives.

We cover 100% of your project requirements with proven expertise

VISUAL LEARNING PRESENTATIONS

AMR occurs when bacteria, viruses, fungi and parasites change over time and no longer respond to medicines, making infections harder to treat and increasing the risk of disease spread, severe illness and death.

AMR is a dangerous because:

- It increases the risk of disease spread, severe illness and death.
- It threatens the achievement of UHC & Sustainable Development Goals (SDG).

PROFESSIONAL COURSE DEVELOPMENT

AI in Financial Forecasting

Your 24/7 Financial Analyst!

The diagram illustrates the process of AI-powered financial forecasting. It starts with an 'AI-Powered Financial Forecasting' box containing a robot icon. This leads to a 'Machine Learning' box, which then branches into four analysis components: 'Historical Data Analysis', 'Market Trend Analysis', 'Economic Indicator Analysis', and 'Complex Pattern Identification'. These components feed into a large blue oval, which then points to 'Improved Forecast Accuracy'. A presenter is visible in the bottom right corner of the slide.

AI in Personalized Treatment

The diagram illustrates the process of AI in personalized treatment. It features four numbered steps: '01 Genetic makeup analysis', '02 Previous treatment responses', '03 Current health status', and '04 Tailored treatment recommendations'. These steps are represented by colored arrows pointing towards a central horizontal bar. From this bar, four arrows point to icons representing: a DNA helix (Genetic makeup analysis), a medical chart with a plus sign (Previous treatment responses), a person with a checklist (Current health status), and a document with a checklist (Tailored treatment recommendations). A presenter is visible in the bottom right corner of the slide.

Why Partner with DConstellations?

End-to-End Capability

From storyboarding to final delivery, we handle every aspect of e-Learning development in-house.

Scalable Resources

Our team can scale to meet tight deadlines and large project volumes.

Quality Assurance

Rigorous testing and review processes ensure flawless delivery every time.

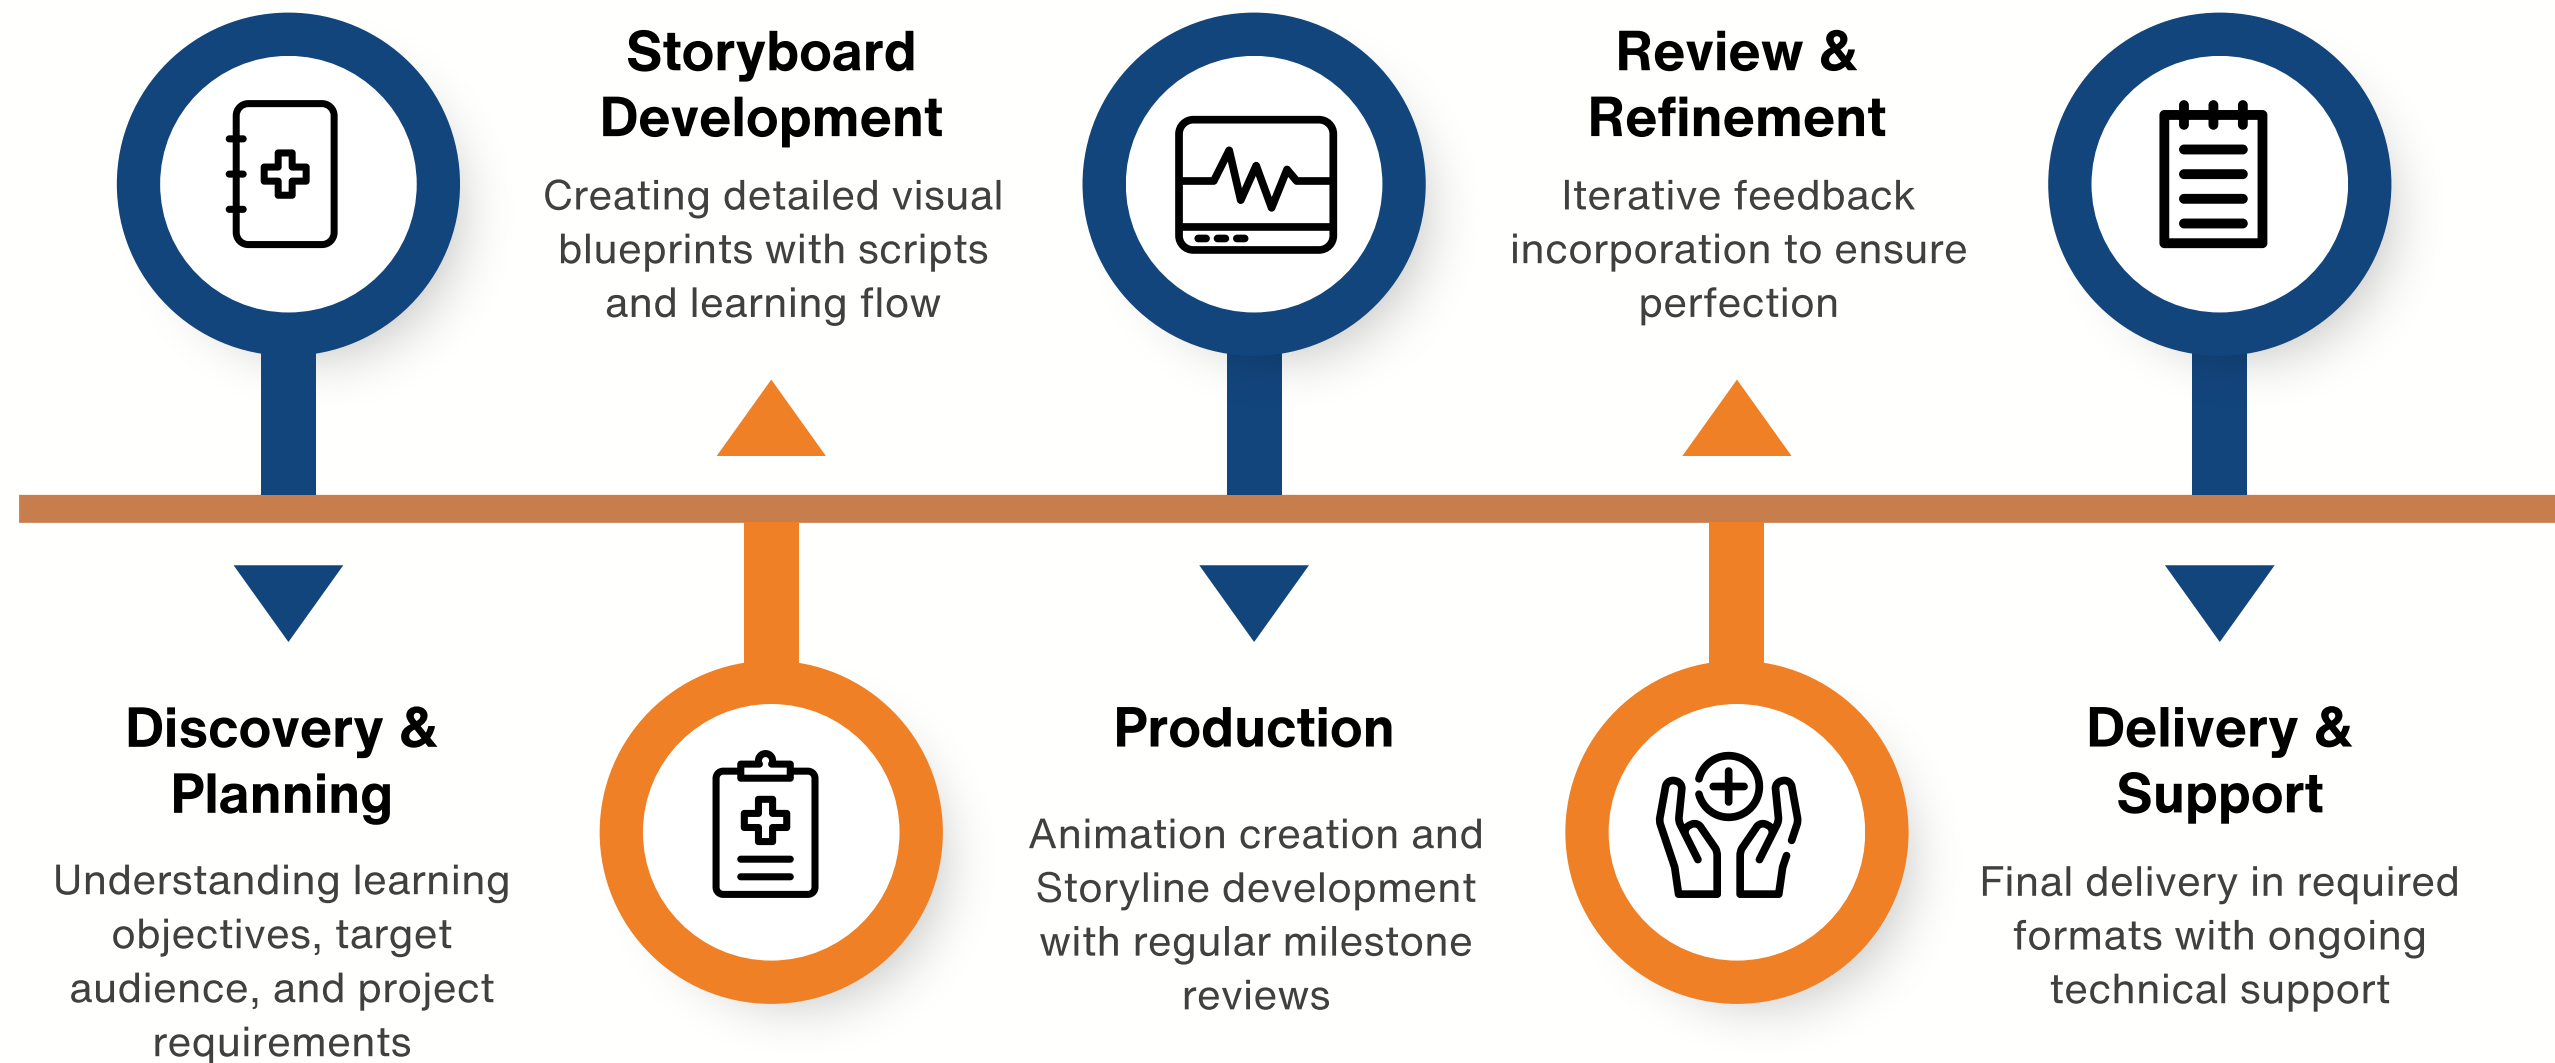

Innovation Focus

We stay ahead of e-Learning trends, incorporating gamification and modern design principles.
